

Thank you Marci!

It's not a sprint, it's a marathon. Actually, it's a relay! In July Marci will be handing the WN lead and Health System Educator baton back to Casey. Marci has dedicated the last 4 years to the SASH program, and **we are immensely thankful for her leadership**. Marci is stepping away from SASH to pursue a new professional opportunity as a lead staff nurse at Northern Counties Express Care, while also dedicating more time to her family's dairy farm.

Casey Doerner, current Assistant Director and former Health systems educator and WN lead, will be covering next year's heart disease quality improvement work and supporting the wellness nurses for SASH.

We decided not to replace this position until there is more clarity in the funding through the anticipated AHEAD model.

Marci will be supporting the heart disease grant through the end of July and working one day a week during that time. Please continue to reach out to her with questions about that grant work.

Reach out to Casey for any nursing questions, suggestions, or concerns. Please be patient with us during this time of multiple hat wearing.

Warmly,

Casey and Marci
